### Professional Summary

Senior Software Developer with 10 years of experience and a degree in Systems Analysis and Development. Currently working as a **Senior Frontend Developer** with a focus on **React/Next.js**.

Strong technical expertise in the JavaScript ecosystem (React, Next.js, React Native, Angular, Vue, and Node.js), with experience in technical leadership for projects and system modernization.

My work prioritizes delivering robust solutions while following best practices and design patterns, with a focus on solving real problems and generating business value.

### Professional Experience

#### Cast Group | Senior Frontend Developer

September 2021 – February 2026

- Responsible for creating and maintaining complex UI screens, including advanced filtering, dynamic tables, and Role-Based Access Control (RBAC).
- Spearheaded legacy migration efforts, refactoring Class Components to React Hooks and modernizing applications using React Query, React Hook Form, and Zustand for state management.
- Implemented unit testing suites using Jest.
- Developed new features for the **Sebrae Super App** (React Native), managing backend integrations and UI/UX refinements.

#### Stefanini Group | Senior Frontend Developer

January 2021 – September 2021

- Technical Lead for the Federal Police corporate **Design System**, delivering the project in just 9 months after previous internal attempts had failed.

- Defined and implemented a reusable component architecture using Angular 10+ and TypeScript for multiple cross-functional teams.
- Configured automated testing (Jasmine/Karma) and CI/CD pipelines (Jenkins/TFS).

## **Freelancer | Full Stack Developer**

*September 2012 – September 2021*

- End-to-end development: requirements gathering, architecture design, and implementation of custom web applications.
- Built scalable APIs and robust backends using Node.js and Laravel.
- Developed dynamic interfaces with Vue.js and managed database modeling.

## **CAPES | Mid-level Full Stack Developer**

*March 2019 – December 2020*

- Implemented features and improvements for the **Freire 2 Platform** (Basic Education Platform) using PHP/Laravel, Angular, Doctrine, and Oracle DB.
- Diagnosed and led the restructuring of the data modeling (Oracle DB) to accommodate new payroll calculation rules, ensuring correct payments for scholarship teachers.
- Developed RESTful APIs with PHP (Laravel/Lumen) and Angular-based interfaces.

## **CNM - National Confederation of Municipalities | Junior Full Stack Developer**

*August 2017 – March 2019*

- Developed analytical dashboards (Fuel Crisis Observatory, Oil Royalties) using D3.js and Vue.js.
- Implemented interactive maps and maintained the Event Management and Registration Platform.
- Full Stack role using PHP (Laravel), MySQL, and JavaScript.

## **CP Marra | Junior Full Stack Developer**

*April 2015 – August 2017*

- Developed automation for tax analysis calculations, reducing operational time from 1 hour to an average of 5 minutes (**90% efficiency gain**).
- Eliminated human errors and fiscal risks in tax guide generation.
- Modernized legacy systems (PHP/jQuery) to modern stacks (Laravel/Vue.js).
